

FRANCO BIANCO (Live! & DJ Set)

Since his first steps, **Franco Bianco** has been related to music and since then, he has polished a personal sound. Though he is an electronic musician orientated to the dance floor, his work covers from ambient or music to listen at home, to techno merged with folk, country and tango. That's why he has been mentioned as **the Danny Boyle of electronic music** by some European media.

Currently settled in **Switzerland**, his music took him on worldwide tours (from **Australia** to **Lebanon**, through **Japan** and **Egypt**), with more than **200 presentations** in **27 different countries** during the last 5 years. In many European countries, there have been queues to see his shows and in **Cyprus** he is a referent of the electronic music scene. His YouTube videos and social networking pages have **thousands of visits**, and he frequently does **interviews for local media** of the countries he is visiting. His **vinyl records** (the last three being sold out) are played by international artists like Hernan Cattaneo, Laurent Garnier or the mythical Danny Tenaglia, among others. Lately, he has been signing his music on respected labels such as **Hypercolour**, **Dilek Records**, **Multivitamins** and **Voltage Musique** between others vinyl and digital imprints.

Every year, from November until the end of December, he also presents himself in South and Central America by offering a tour in these regions. He has played in **Ecuador**, **Colombia**, **Mexico**, **Uruguay**, **Dominican Republic** and in **Argentinean** mega festivals like **Telecom Personal Fest** (2004) as well as the last editions of **Creamfields Buenos Aires** (2008, 2009 and 2010). In Europe, he also presented himself at the well-known **Circle of Love Festival**, in Germany (2010). (<http://www.youtube.com/watch?v=DR1uUhiYeaE>)

His last project was a **Vinyl & CD edition**, with remix versions from singer-songwriter **Jorge Drexler** (winner of an Oscar), which he produced together with Nacho Benedetti. This important album also included the remixes of Mike Shannon and Jesper Dahlback. Franco has presented this album in 2011, from September until December in **23 European and American cities**. On his SoundCloud page, you can listen to the Tour-Closing night, with the sound of the crowd. In this way, you'll feel the energy of this **unforgettable presentation**.
